The Garden Gazebo

Gazebo design / Illustrative design direction

A focal point for the garden, with a room-like sense of shelter.

Study an octagonal gazebo, seating and a landscaped route from the existing home.

AS-BUILT FIRST

Project plans are prepared after our as-built teams measure and document the existing structure. This sample is a design schematic, not actual construction or permit plans.

Sample illustration only. No existing building has been surveyed for this concept.

What stays. What changes.

Gray: existing context / Blue: proposed work or area of study

Measured survey required before design development

Existing: open lawn

OUTDOOR SPACE STUDY

Proposed: garden pavilion

RETAIN / VERIFY

Existing residential lot and retained planting.

NEW / ALTER / COORDINATE

Gazebo envelope, seating and garden approach.

These diagrams communicate relationships and scope only. They are not traced from the rendering, not dimensioned, not to scale and not an assessment of any existing structure.

A starting point for your layout.

Conceptual space relationships - adjust after existing conditions are measured

DESIGN QUESTIONS

Which relationships matter most in The Garden Gazebo? Identify daylight, privacy, circulation, storage and indoor/outdoor connections. Use the companion worksheet to record decisions before a measured layout is developed.

PROJECT-SPECIFIC REVIEW

Footings and utilities; roof uplift; setbacks; accessible path goals; drainage away from supports.

Next: complete the design layout worksheet, arrange the as-built visit and agree a location-specific scope. No structural sizes, footing depths or construction details are established by this sample.
