The Everyday Deck

Standard deck / Illustrative design direction

A straightforward deck, organized beautifully for everyday use.

Separate dining, grilling and clear circulation on a simple single-level platform.

AS-BUILT FIRST

Project plans are prepared after our as-built teams measure and document the existing structure. This sample is a design schematic, not actual construction or permit plans.

Sample illustration only. No existing building has been surveyed for this concept.

What stays. What changes.

Gray: existing context / Blue: proposed work or area of study

Measured survey required before design development

Existing: rear yard

OUTDOOR SPACE STUDY

Proposed: single-level deck

RETAIN / VERIFY

Existing house and garden relationships.

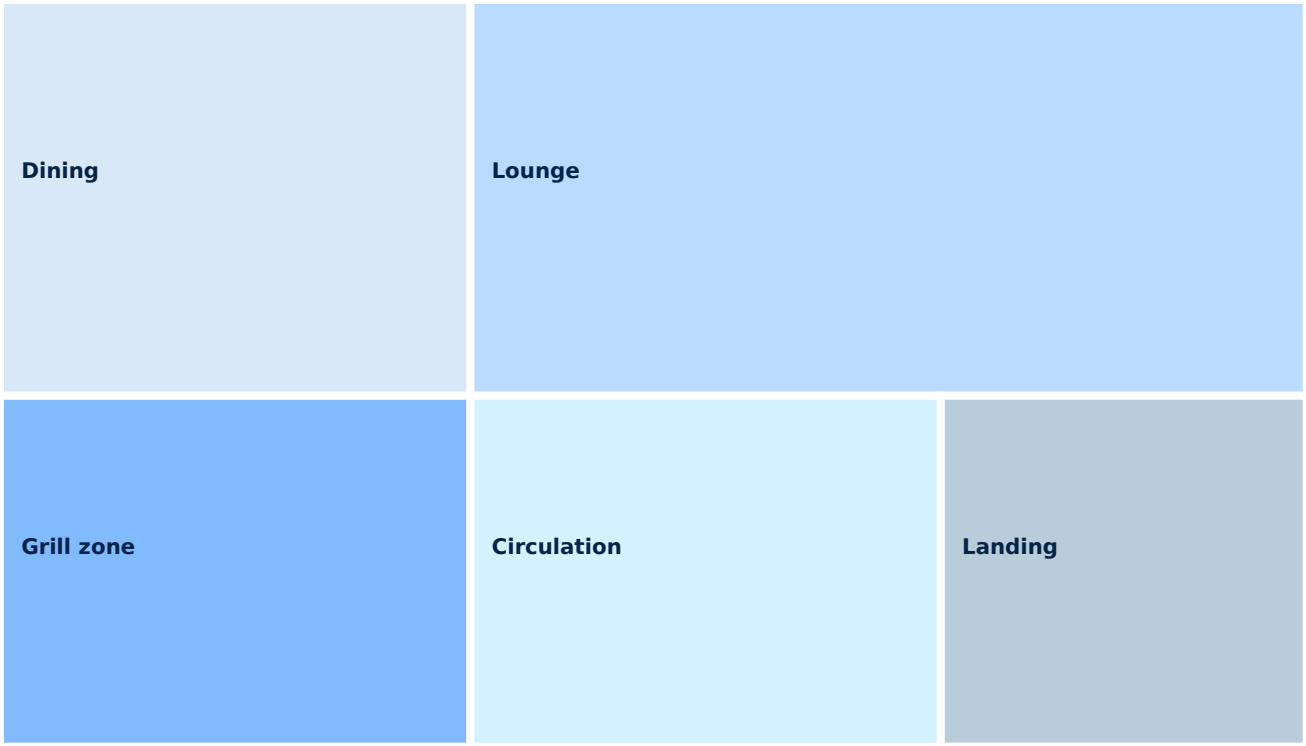

NEW / ALTER / COORDINATE

Deck zones, access and railing design direction.

These diagrams communicate relationships and scope only. They are not traced from the rendering, not dimensioned, not to scale and not an assessment of any existing structure.

A starting point for your layout.

Conceptual space relationships - adjust after existing conditions are measured

DESIGN QUESTIONS

Which relationships matter most in The Everyday Deck? Identify daylight, privacy, circulation, storage and indoor/outdoor connections. Use the companion worksheet to record decisions before a measured layout is developed.

PROJECT-SPECIFIC REVIEW

Ledger or freestanding support strategy; existing wall condition; footings; guard requirements; stair and landing coordination.

Next: complete the design layout worksheet, arrange the as-built visit and agree a location-specific scope. No structural sizes, footing depths or construction details are established by this sample.
